**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/20/03 has been entered.

The Examiner has carefully considered Applicant's amendments and accompanying remarks dated 11/20/03. Applicant's amendments to the claims have been entered and are made of record. Applicant's remarks are sufficient to overcome the previously made art rejections. It should be made of record that at the time of applicant's filing date there was very little if anything published on side curtain airbags. The structure is vastly different than that of driver and passenger side airbags which were known at the time.

With regard to the double patenting rejection made over 09/557643, which is currently pending at the BPAI, Applicant has stated in their remarks that the a Terminal Disclaimer over this application has been filed however, as this file was reconstructed, the Examiner does not see it nor does Palm show any fees associated with it, and the Examiner believes that this may just not have been transmitted. Please remit so that the application is complete.

***Allowable Subject Matter***

2. Claims 1-39 are allowed.
3. The following is an examiner's statement of reasons for allowance: it is the position of the Examiner that at the time the invention was filed there was no prior art that teaches or suggests the structure and chemistry as cited in the current claims. There was no prior art that suggested a side curtain airbag comprising a fabric coated with an elastomeric composition in an amount as little as and minimally 0.8 to 2.5 ounces per square yard. Said side curtain airbag which then would exhibit the properties of leak down time after inflation of at least 5 seconds, a tensile strength of at least 2,000 psi, an elongation of at least 180% and a rolled packing volume of from about 17 to 24..

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
